**RE: 2024 Hazardous Liquid Operator Qualification Inspection – BP Pipelines
Headquarters – (Insp. No. 8769)**

Dear Mr. Vodicka:

Staff from the Washington Utilities and Transportation Commission (staff) conducted a Hazardous Liquid Operator Qualification (OQ) inspection of BP Pipelines Headquarters (BP HQ), from May 28, 2024, to May 29, 2024. The inspection included a review of the OQ process and records, as well as an audit of OQ individuals performing the installation of a cleaning pig into a 24-inch crude pipeline in the field onsite at a facility in Ferndale, WA.

There were no issues noted during this inspection; therefore, this inspection will be closed as of the date of this letter.

Staff thanks BP HQ's personnel for their professionalism and cooperation during the audit. If you have any questions or if we may be of any assistance, please contact Anthony Dorrough at (360) 481-4035.

Sincerely,

Scott Rukke
Pipeline Safety Director
